RC-6033579

Grade A. House - Meeting with Dr. Rennett. Additional.
Wed June 17, 1981 D. Loto, Penn, Ruby.
In Lake's name - Lunde: Rennett - no question
Dr. Rennett request:

- ① List of additives used in the O.L. @ what
any toxicity tests. (Complete list - ex-0)
- ② List of inputs now for public health
problems.

Commonly added ingredients. Start with
date 1965 - they don't want out off point.
Grandfathered. Employed "commonly" &
out of date. We wanted fair treatment.
They want a voluntary program. - Value
The following things are agreed to:
Don't want to go in steps. We want
no little FDA. List of testing. They
want toxicology tests. Some will be covered

more or less as mental. I look up in fence staff.
Watch out for the little FDH. No inhibition
test. Should think that he is going to get
something on testing. HHS starting off
procedures (Reduction of force) lets along our
fut. But this being reasonable puts us
down a slippery slope. Question case. They
have shown that we set to back at
present publ. Construction. (Toxicologist).
Would raise public health problems. Reference
to Day study. Also stafflet.

Start off with a composite list. They
promised no surprises from conference.

What is the effect on litigation? Under
pressure of voluntary health associations. They
are looking for additional rules. We should
ask what the additional rules are. Then
see them in the doc and/or educate them.

Crofters - we select toxicologist,
do additional tests despite structure - even
though. (Watch out for mini FDH).
What about liquor & beer. Drawing up the
conditions could take quite a while.

Stew - they litigation - to find a
question may put us into a law suit - possibly
on additives. Reference to other Working Party
& it turned aside many inquiries.

Succession as to next meeting in August.
They will say toxicologist, topic, who suspect in
the structure.

Does HHS use Croft? HHS has
no facilities. Stew - we have to expect
P&G agrees.

The list of ingredients comes last. At
procedure first. RTR handled out claimed
Focus article. We can test or they procedure.
Procedures & Standards - we are not going to
elaborate Cross.

Chilecote - Same by Army to get
readily attention - Do we - consider aggregations.
But pure independent scientist. Let our
toxicologist friends. Let our research director
to consider procedures & methodology.

Agenda #1, CTR & Special Project : Stein - question
quality of record.

Sept 7, 1981 is a coming in c of c meeting.
